

TMNT SUPERMUTANTS™ TEENAGE MUTANT NINJA TURTLES

Kids,
follow these
simple blueprints,
it's easy!

There's a new dawn ahead for the super legion of green as they take to the air on the SuperMutant Cyclone Cycle, a Foot-flattenin' mean green machine that has become the avenging angel of the righteous and the scourge of the scum. The sky belongs to our heroic SuperMutant Turtles as they go on patrol to shake loose the vermin and villians of the street. Get ready for justice to be served!

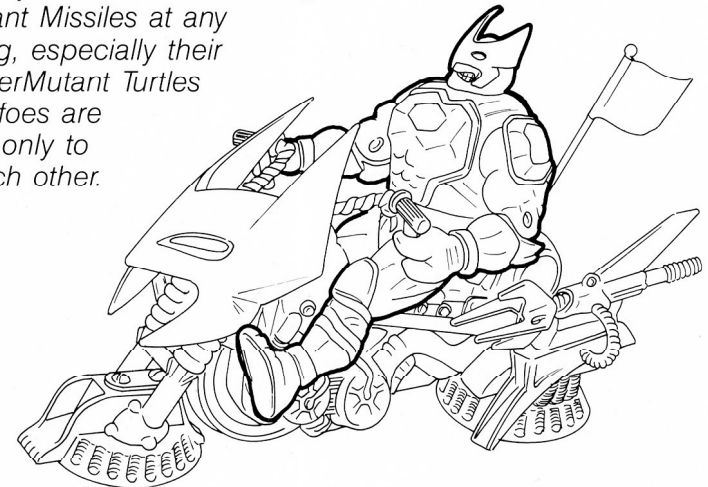

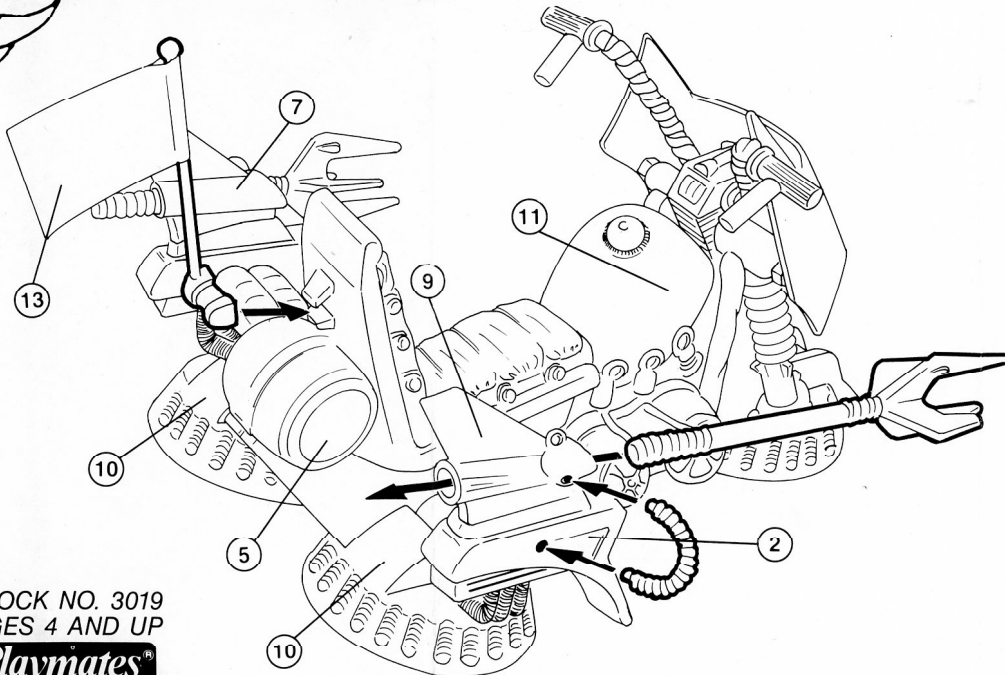

1. Gettin' ready to ride is easy to the Anti-slip Turtle Grip Handle Bars to protect our fearless Turtles from oncoming Foot action.
2. Insert the SuperMutant Anti-Foot Flag as shown on the back of the SuperMutant-sized Seat so everywhere our SuperMutant heroes go, they let their allegiance fly behind them! Attach both hoses to rear tail fins as shown.

3. To load and launch SuperMutant Finger Flick Missiles, insert each missile all the way back into the missiles shaft as shown. To fire, quickly flick end of the missile with your finger and watch the foul Foot fiends go flying!

CAUTION:

Make sure you never aim the Finger Flick Mutant Missiles at any living thing, especially their eyes! SuperMutant Turtles and Foot foes are designed only to attack each other.
